

FIRST IN THE ASEAN REGION

We are a Philippine-based company pioneering in advanced specialty diagnostics. We utilize advanced technologies and validated analytical methods performed by highly competent and internationally trained staff to provide the most comprehensive specialty diagnostics in the ASEAN region.

Our method development and staff trainings were proudly supervised and benchmarked by the European Laboratory of Nutrients (ELN).

WORLD CLASS SPECIALTY CLINICAL LABORATORY

We believe that science and technology can elevate medical practice, improve treatment outcomes, and provide better quality of life. It is our commitment to make globally-competitive specialty diagnostics within reach of every Filipino and ASEAN nation.

Whether you're a health care provider, drug manufacturer, medical researcher, or patient seeking targeted intervention, our most comprehensive advanced specialty tests can help you make more confident health decisions.

OUR MISSION

We aim to become the leading provider of advanced specialty diagnostics in the region through consistent innovation and implementation of the highest standards.

We made it our mission to provide services that contribute to holistic patient care and better health management outcomes through:

Clinical Excellence and Expertise

We utilize advanced technologies and validated test methods performed by highly competent and internationally trained staff.

Continuous Quality Improvement

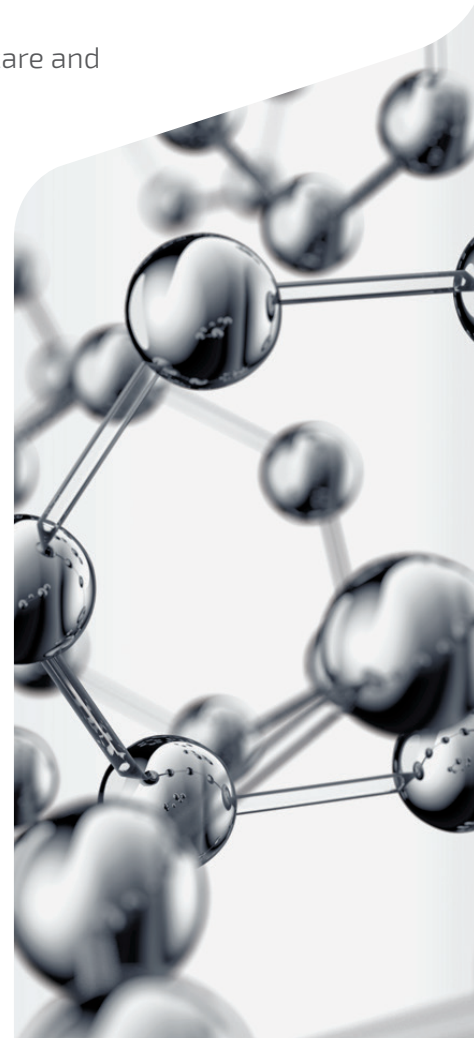

We consistently evaluate and implement best practices across different areas of laboratory operations in accordance with international standards.

Customer-Responsive Operations

We provide consistent quality service responsive to customers' needs, especially for the practice of personalized medicine.

Collaborative Partnerships for Sustained Growth

We work in collaboration with healthcare providers to provide the best service and education for them and their patients. We also partner with institutions in providing world-class testing services for their research projects.

**PROACTIVE APPROACH.
PRECISE ANALYSIS.
PERSONALIZED HEALTH.**

OUR DIAGNOSTIC TOOLS AND CAPABILITIES

Our vast portfolio of specialty tests can help identify the root cause of complex symptoms and medical conditions that are often undetected via routine laboratory tests. Our specialties include:

- Micronutrient Testing – vitamins, minerals, fatty acids, amino acids, antioxidants
- Heavy Metals & Environmental Toxins – mercury, lead, arsenic, cadmium
- Allergies & Sensitivities – food & inhalant allergies (IgE), food sensitivities (IgG)
- Inflammatory Markers & Gut Health Markers - fecal calprotectin, IL6
- Organic Acids Test - metabolic byproducts that help analyze nutrient absorption & utilization, detoxification, neurotransmitter function, and gut bacterial overgrowth

We employ state-of-the-art technologies, validated test methods, and highly competent and internationally trained laboratory crew. Our cutting-edge analytical instruments include:

- Inductively Coupled Plasma Mass Spectrometry (ICP-MS)
- Liquid Chromatography with Tandem Mass Spectrometry (LC-MS/MS)
- Gas Chromatography (GC)
- High Pressure Liquid Chromatography (HPLC)
- Microplate Reader - UV/VIS, Fluorescence, Luminescence
- Clinical Chemistry Analyzer (CA)
- Ultra Performance Liquid Chromatography (UPLC)

WHY PARTNER WITH US

1. The most comprehensive advanced specialty tests in the ASEAN region
2. Industry-leading technologies and methodologies
3. Highly competent and internationally trained laboratory team
4. Fully integrated cloud-based Laboratory Information System (LIS)
5. Quality assurance via proficiency testing and ISO certification

ACCREDITATIONS & LICENSES

Bureau Veritas ISO 9001:2015

U.S. CNC Division of Laboratory Sciences 2019 LAMP Program

DOH Registered Laboratory Health Facilities and Services Regulatory Bureau

College of American Pathologists Recognized Laboratory

European Research Network Evaluation and improvement of screening –
Diagnosis and Treatment of Inherited Disorders of Metabolism
